

7 September 2021

Dear Exhibitors, Visitors and Partners,

Even with the recent decrease in COVID-19 transmission cases in Thailand over the past two weeks, the Bangkok area keeps being disrupted. For safety reasons, VNU Asia Pacific as organizer, together with the Science and Technology Trade Association (STTA) and Thailand Center of Excellence for Life Sciences (TCELS), have decided to stage Thailand LAB INTERNATIONAL 2021 & FutureCHEM INTERNATIONAL 2021 as **fully virtual event during the original show dates 27-29 October 2021.**

Thailand LAB & FutureCHEM 2021 will be convened fully under a sophisticated Virtual Platform for both Exhibition and Conferences. There will be no physical exhibition at BITEC due to the ongoing COVID-19 situation anymore this year.

Thailand LAB INTERNATIONAL 2021 will present the virtual exhibition gathering booths from global organizations, international associations and companies with interactive facilities to enhance the online experience. This new digital platform will enable exhibitors and visitors to pre-register online, gather show information, explore virtual booths, attend online conferences and conduct business matching and networking.

Best regards,

Thailand LAB Organizer
